-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 1.5. 6) ☐ Other: _____

Applicant's election of Group II-claims 13-30 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 31 and 32 are hereby withdrawn from further consideration.

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The disclosure is objected to because of the following informalities: Throughout the specification, the applicant recites language directed towards "claim 1", "claim 11", and "claim 12" which fails to properly describe the applicant's invention.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Djavairian et al. Djavairian et al. disclose a vehicle door assembly comprising an outer panel (14), a support element (12), an inner panel (74 in figure 8), a spacing element (198 and 204) in the form of settable adhesive, and an elongated stiffening element (78) detachably mounted via bolts (see figure 2).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to Freeman discloses an outer panel connected to an inner panel via adhesive (36 and 38) similar to that of the applicant's invention. U.S. patent to Altman et al. disclose an outer and inner panel assembly having a reinforcing element (50) similar to that of the applicant's invention. U.S. patent to Jennings discloses an adhesive, which attaches an outer panel to an inner panel similar to that of the applicant's invention.
